## Specifications:

Treble Booster Plus, Treble Booster Deluxe and Treble Booster Touring have been designed to tonally complement the Brian May "Red Special" style guitar and are designed to be used with the Normal channel of the Vox AC30 amplifier. However excellent results can be obtained when using the Fryer Treble Boosters with many other conventional guitar and amp combinations.

Output level of the boosters is preset internally at maximum gain, in the same format preferred by Brian May.

**Gain:** Treble Booster Plus 36dB  
Treble Booster Deluxe 35dB  
Treble Booster Touring 31dB

**Power:** PP3 9 Volt battery  
(Alkaline type recommended)

Power is turned on by plugging the guitar lead into the "IN" jack socket. Please remove guitar lead from the jack socket when unit is not being used to conserve battery life.

**Current consumption:**  $\leq 508 \mu\text{A}$

**Battery life:** 500 hrs continuous use or greater

**Dimensions:** length: 120mm width: 73mm depth: 38mm

PRODUCT BROCHURE

FRYER SOUND LTD

[www.fryerguitars.com](http://www.fryerguitars.com)

At Fryer Sound, our aim is to produce great sounding high quality guitar products which give excellent value for money.

Our products are proudly manufactured in our UK factory by a team of dedicated technicians. Each guitar effect pedal design has been fine tuned and its components selected and specified by Greg Fryer in order to achieve the same high quality sound as his renowned hand made units.

It is of great importance to both Brian and ourselves that the Brian May/Fryer treble boosters are manufactured to deliver professional sonic performance and reliability. To ensure this we use only proven quality parts such as Switchcraft jack sockets, Bulgin battery drawers and other high quality parts and components throughout our products.

We hope you enjoy using the products that we have enjoyed so much developing and making.

Yours sincerely,

**Greg Fryer and Nigel Knight**

*Fryer Sound Ltd*

### Treble Booster Touring:

*"Moderate Gain, a balanced sound with sweet harmonic detail and smooth treble definition."*

The Treble Booster Touring is the booster that Brian May has been using for his live and recorded work since 1998. It gives 31dB gain, has a sweet rich harmonic character to its sound and gives good definition and detail even at full volume distorted amp settings. The TB Touring provides balanced rhythm guitar sounds as well as soaring lead guitar sounds, and as the guitar's volume control is wound down the TB Touring cleans up beautifully with sparkling rhythm sounds on offer.

Although designed initially for the Brian May Red Special style guitar, many of our customers have found that the TB Touring works extremely well with conventional single coil and humbucking pickup guitars when used with a range of different valve amps.

Recorded examples of this treble booster can be heard on Brian May's 1998 solo album "Another World", and on all his recorded work since 1998 including the 2008 Queen + Paul Rodgers album "The Cosmos Rocks".

### Treble Booster Deluxe:

*"Powerful, rich, good treble detail"*

The Treble Booster Deluxe gives 35dB gain, is tonally placed between the TB Touring and TB Plus and produces richness and punch whilst retaining much definition too. This booster has been developed to strongly evoke Brian May's sound from the mid 1970s Queen albums such as "Sheer Heart Attack" and "A Day At The Races", as well as being very similar to Brian's well known 1980s live concert sound. The TB Deluxe has been the favorite booster choice of our customers when using a speaker attenuator with their Vox AC30 amps. Many customers have also reported that the TB Deluxe works very well with other humbucking and single coil pickup guitars into various types of valve amps.

### Treble Booster Plus:

*"Fat, smooth and powerful"*

The Treble Booster Plus gives 36dB gain and is the fattest and most powerful of our treble boosters. It is designed to evoke the rich powerful vocal-like tones of Brian May's recorded sound from the late 1970s Queen albums "News Of The World" and "Jazz". On the frequency response graph, the TB Plus shapes its boosted frequencies more towards mid range territory than the other boosters, with its peak at approx 2.5K Hz and its top end smoothed off more than the TB Deluxe or TB Touring pedals. For non-BM use, several of our customers have told us they like the TB Plus for producing fat overdriven rock sounds when using humbucking pickup guitars into bright sounding 6L6 or EL34 valve amps. The TB Plus is also very useful for adding punch and richness to single coil pickup guitars.

### Warranty:

Our goal is to build every pedal to the highest quality standards and from the finest components in order that they provide you with many years of reliable service. For your benefit, we recommend that you record the serial number found on the product and keep it safe along with proof of purchase. This information will allow us to better serve your needs.

What is covered: All parts defective in material and workmanship. What is not covered: Defects resulting from improper or unreasonable use or maintenance, accident, unauthorised tampering, alteration or modification.

Limitation to Liability: The maximum liability of Fryer Sound Ltd shall not exceed the actual purchase price paid for the product. In no event shall Fryer Sound Ltd be liable for incidental, consequential or indirect damages.

For how long: The Fryer Sound Ltd warranty lasts one year from the purchase date.

What we will do: In the event of a problem we will repair or replace any defective parts free of charge.

What to do if you suspect that a unit is faulty: Please return the product with proof of purchase either to the original place of purchase, or directly to Fryer Sound Ltd with pre-paid return postage included.

Is the Warranty transferable: Yes, this warranty is fully transferable provided that the current owner furnishes the original proof of purchase from an authorised Fryer Sound Dealer.

For UK only: This Warranty in no way affects your rights under statutory law.
